

ACADEMIC ADVISOR FUNCTION REGULATION

The purpose of the introduction of the institution of the Academic Advisor (AA) is to improve the level of studies in the Postgraduate Program (PP) "Environmental Sciences and Public Health" by offering responsible consulting work and on a personal level to postgraduate students. This consulting project concerns the general case of guidance regarding academic matters, as well as specific issues that may arise. The student may seek the advice or assistance of the AA in any matter arising during the academic semester. Any problems of student relations with other faculty members are settled through the AA. Also, the AA can inform the student in case he is asked to do so by a faculty member, who notes any kind of problems in the student's performance (e.g. continuous absences, systematically poor performance in exercises, unexcused abandonment of a cycle of exercises).

The role of the Academic Advisor is assumed by a member of the PP Board appointed by the PP Director.

In the event that the AA does not respond to his duties in the manner required by the institution, the student or students whom he/she has taken over, may request his/her replacement with a formal application to the Committee of the PP Department.
