

## **Evangelia Samoli**

*Associate Professor of Epidemiology and Medical Statistics, Medical School, NKUA*

Evangelia (Evi) Samoli is an Associate professor of Epidemiology and Medical statistics at the Medical School of the National and Kapodistrian University of Athens, Greece. She graduated from the School of Mathematics at the NKUA, received a M.Sc. in Social Statistics from the University of Southampton, United Kingdom, and her Ph.D. in Epidemiology from the Medical School of the University of Athens. She teaches Biostatistics and Epidemiology in under or post graduate courses, while she has organized various short courses on Biostatistics and Environmental Epidemiology. Her research interests include environmental epidemiology that focuses on the health effects of air pollution and statistical methods for the analysis of time-series and longitudinal data in environmental epidemiology. She has published more than 180 peer-reviewed articles in international journals with over 11,000 citations, while she has participated in more than 88 conferences with various announcements. Samoli has been a member of committees for the World Health Organization and the US Health Effects Institute. She is a member of Greek and international scientific societies that are active in environmental epidemiology issues. She was the co-chair of the 34<sup>th</sup> Annual conference of the International Society of Environmental Epidemiology in 2022 in Athens.
